Cannot hide Arts.

HEire of thy Fathers goods, and his good parts,
Which both preserveſt, & augment'ſt his ſtore,
Tracing th' ingenuous ſteps he trod before:
Proceed as thou begin'ſt, and win thoſe hearts,
With gentle curt'ſie, which admir'd his Arts.
Whilſt thou conceal'ſt thine own, & do'ſt deplore
Thy want, compar'd with his, thou ſhew'ſt them more.
Modeſty clouds not worth; but hate diverts,
And ſhames baſe envy, ARTS he CANNOT (HIDE
That has them. Light through every chink is ſpy'd.

Tradescant. 9:

To the Ingenious

READER.

FOr some *reasons* I apprehend my self engaged to give an *account* of *two* things, that refer to the ensuing *piece*: The one, for not *publishing* this *Catalogue* untill now: The other, of the *mode* & *manner* thereof, being partly *Latine*, and partly *English*.

About three yeares agoe,

goe, (by the perſwaſion of ſome *friends*) I was reſolved to take a *Catalogue* of thoſe *Rarities* and *Curioſities* which my *Father* had ſcedulouſly *collected*, and my *ſelfe* with continued diligence have *augmented*, & hitherto *preſerved* together: They then preſſed me with that Argument, *That the enumeration of theſe Rarities, (being more for variety than any one place known in* Europe *could afford) would be*

an

an honour to our Nation, and a benefit to such ingenious persons as would become further enquirers into the various modes of Natures admirable workes, and the curious Imitators thereof: I readily yeilded to the *thing* so urged, and with the assistance of two worthy *friends* (well acquainted with my design,) we then began it, and many *examinations* of the *materialls* themselves, & their *agreements* with severall Au-

thors *compared*, a *Draught* was made, which they gave into my hands to examine over. Presently thereupon my *onely Sonne dyed*, one of *my Friends* fell very *sick* for about *a yeare*, and my *other Friend* by unhappy *Law-suits* much disturbed. Upon these accidents that *first Draught* lay neglected in *my hands* another year. Afterwards my said Friends call again upon me, and the designe of *Printing*, a-new *contri-*

ved,

ved, onely the prefixed *Pictures* were not ready, and I found my kinde friend Mr *Hollar* then engaged for about tenne Moneths, for whose hand to finish the *Plates*, I was necessarily constrained to stay untill this time.

Now for the *materialls* themselves I reduce them unto two sorts; one *Naturall*, of which some are more familiarly known & named amongst us, as divers sorts of Birds, foure-

footed Beasts and Fishes, to whom I have given usual *English* names. Others are lesse familiar, and as yet unfitted with apt *English* termes, as the shell-Creatures, Insects, Mineralls, Outlandish-Fruits, and the like, which are part of the *Materia Medica*; (Encroachers upon that faculty, may try how they can crack such shels.) The other sort is *Artificialls*, as Vtensills, Householdstuffe, Habits, Instruments

ments of VVarre used by severall Nations, rare curiosities of Art,&c. These are also expressed in *English*, (saving the Coynes, which would vary but little if Translated) for the ready satisfying whomsoever may desire a view thereof. The *Catalogue* of my *Garden* I have also added in the Conclusion (and given the names of the *Plants* both in *Latine* and *English*) that nothing may be wanting which at

sent comes within view, and might bee expected from

Your ready friend

JOHN TRADESCANT.

FINIS.

Modern deteriorated sheepskin binding removed. Book taken apart. Scotch tape removed. Paper deacidified (Barrow's magnesium bicarbonate formula), 22 leaves reinforced with silk tissue. Many inlays where paper missing. Collation of first signature was wrong when received (A4 was before A3) so a xerox of these leaves was sent to Yale Library & arranged in correct order. Book resewn with all-rag end papers, unbleached linen hinges, hand-sewed headbands. Rebound in full oasis morocco leather.
